

Enclosed is your new \*\*\*\*\* Bank VISA check card. VISA is requiring all issuers of debit and credit cards to migrate from the current 6-digit Issuer Identification Number to a longer 9-digit standard by April 2022. The new longer Issuer Identification Number will allow the Bank and VISA to support new electronic forms of payments. While the length of the card number will remain at 16 digits, you will need to re-register your card for any automatic payments.

Please activate your card. You can activate your card by calling 1-800-000-0000 from your primary phone and selecting option #5, or by using the card with your new pin, which will arrive in a separate mailing.
