“+” or “-” – will increment/decrement analysis items 3 and 4
A – will increment/decrement the item that is cross-referenced using DDAAPAR #7
B – will increment/decrement analysis items 3 and 4. AND any items cross referenced using DDAAPAR #7.

ADDITIONAL SELECTIONS

Add to MMD debit count

PREVIOUS < | SUBMIT > | EXIT ✕

If a customer wishes to close an interest bearing account, you need to add the accrued amount to the balance of the account to come up with the transaction amount. When a credit transaction code is used with this affects code (C to C) the accrued is added to the balance and the year-to-date interest increased. You may need to create two transactions. The first will use a transaction code which affects "C". The transaction amount will be equal to whatever interest is to be credited to the balance of the account.
